

Y3 Home Learning Journey tasks To be returned to school by 16.10.20

Throughout our History lessons this half term we will be discovering about the life of a hunter-gatherer, as we journey from the Stone Age to the Iron Age. Our science lessons will be based around the theme of 'Light'.

Have a go at these activities to support our learning in these areas.

Draw and label a tool or weapon used during the Stone Age to Iron Age period	<i>When there were no caves to shelter near, hunter-gatherers built temporary shelters.</i> Build your own 'hunter-gatherer shelter' using branches and leaves.	Create a fact sheet about the Stone Age. Your fact sheet should be about 1 or more of the following: Tool makers Fire makers Stone-Age clothes Stone-Age food Consider how you are going to present this. Include pictures to support your writing.
1 merit	2 merits	3 merits
Design and make your own road safety outfit. Hint: You'll need to be seen by traffic in the dark!	Use building blocks/lego and a light source to investigate how the size of the shadow can change. Write a conclusion to your investigation.	One of our History lessons will focus on the Stone Age settlement of Skara Brae. Make your own model of a Stone Age settlement.
3 merit	3 merits	3 merits

You can choose to do as many activities as you like but take care with your presentation. The more activities you complete, the more merits you earn- the amount of merits stated above are the maximum you will be rewarded for each task. Please complete your work on paper and stick it neatly into your book. For the making activities, either take a photo of your make and stick it in or bring it in- we love seeing them! When you have completed an activity, colour in the box to show what you have achieved.

Enjoy your learning!

Miss Basey, Mrs Lamb and Mrs Smith
